

Ivan Molina

Frontend Developer

Frontend Developer with 4+ years of experience, specializing in Angular, focused on building scalable, high-performance web applications and intuitive user interfaces that handle complex data flows. Experienced in reactive programming, REST API integration, authentication, reusable components, and modern frontend best practices.

Deeply committed to continuous learning and staying up to date with the latest advancements in the Angular ecosystem, including Signals, advanced reactive patterns, and emerging architectural approaches. Passionate about clean, reliable code, performance optimization, accessibility, and delivering seamless solutions within agile teams.

San Salvador, El Salvador

| SKILLS

Programming languages:	Typescript, Javascript
Frontend:	Angular, RxJs, NgRx, HTML, CSS, Jasmine, Karma
Backend:	NodeJS, NestJS
Code Editor:	Visual Studio Code, Visual Studio
Web libraries:	PrimeNg, Angular Material, Bootstrap, Tailwind
UI/UX Prototypes:	Figma, AdobeXD (as Web developer)
Code Versioning:	Github, Bitbucket
Databases:	MongoDB
Cloud:	AWS
Agile Tools:	Jira

| WORK EXPERIENCE.

DIVIMAH (February 2025 – Present day)

Frontend Developer

Description: Frontend Developer working on a complex DMC-style web application, continuously delivering new features to improve usability, performance, and reliability while handling highly complex data structures and strict data flows. Collaborate within a cross-functional team of developers to design and implement scalable solutions that support evolving business needs.

Leverage modern Angular strategies and tools to build maintainable, adaptable codebases, with a strong emphasis on creating clean, readable components that are easy to extend and refactor. Apply advanced state and data management techniques using Signals, NgRx, RxJS, Subjects, and BehaviorSubjects to ensure predictable data flow and responsive user experiences.

Focused on modern Angular best practices, reactive architecture, and performance optimization, enabling the application to evolve efficiently as new requirements and features are introduced.

Technology stack: HTML, CSS/SASS, BEM, Typescript, Angular, Angular Material, RxJS, NgRX, Signals, NestS,, Git, Jira, NPM.

GC Technologies (January 2022 –February 2025)

FrontEnd Developer

Description: In my role as a Frontend Developer at a growing start-up, I contributed to the development of a large-scale monolithic application built from scratch using Angular. I was involved throughout the full development lifecycle, from architectural decisions to production deployment, delivering scalable features that supported evolving business requirements.

I focused on performance and maintainability by applying advanced Angular techniques such as lazy loading, custom directives, interceptors, and route guards. I implemented secure authentication using JWT for session management, roles, and permissions, ensuring both security and seamless user access. I also integrated complex APIs using RxJS and reactive programming to manage asynchronous data efficiently and enhance responsiveness.

Additionally, I maintained a consistent and scalable UI using SASS with variables and mixins, and leveraged NgRx for predictable state management across complex features. I collaborated closely with UI/UX designers and backend developers to deliver cohesive end-to-end solutions within an Agile environment, actively participating in Scrum ceremonies and code reviews. To ensure reliability, I wrote unit and integration tests using Jasmine and Karma and supported continuous integration practices to deliver stable, high-quality releases.

Technology stack: HTML, CSS/SASS, BEM, Typescript, Angular, PrimeNg, Angular Material, RxJS, NgRX, NxConsole, NodeJs, Express, Git, Jira, NPM, AWS y Figma.

| EDUCATION

Software Engineering (Completed Academic Program)

Universidad Tecnológica de El Salvador.

Frontend Development self-taught, Online Courses (Udemy, Pluralsight)

Studied frontend development through accurate selection of online courses on platforms such as Udemy and Pluralsight.
